FASEB President, 2018-2019
The ASIP is one of five organizations that together comprise The Intersociety Council for Pathology Information (ICPI). ICPI is an educational organization that serves as a central source of information about pathology in the practice of medicine, in medical research, and to provide literature about pathology as a career.

Strengths of Our Society

Strong Core Membership
Strong Scientific Programs and Meetings
Strong Scientific Journals
Excellent Membership Benefits

Including numerous opportunities for service in the ASIP, career development, and networking with leaders of experimental pathology research
Challenges and Opportunities

Stable Membership Numbers, But Need to Grow

Retaining Current Members

Conversion of Trainees into Regular Membership Categories

Recruitment of New Members

Expand Core Membership and Engage More Members

Financial Challenges

Identification of New Revenue Streams
Recognition of ASIP Office Staff

Challenges and Opportunities

Membership is Stable But Needs to Grow

Conversion of Trainee Members to Regular Members
The NextGeneration Membership category is intended for new members and for conversion of postdoctoral trainee members into regular membership categories.

Outreach to Recruit New Members
Outreach to authors of journal articles in AJP
Outreach to Experimental Biology non-member registrants
Priorities for 2019

Outreach Through Departments of Pathology
Outreach to the Chairs of Departments of Pathology related to recruitment and engagement of faculty and trainees

ASIP Ambassadors
Members in all categories will be invited to serve as Institutional Ambassadors, to inform potential members (peers and others) about the value of ASIP membership

Expansion of Social Media Outreach
New Facebook pages for Pathology Education, Pathology Career Development, and Women in Pathology

Recent Activities

- Continued and expanded science policy newsletter & website
- Developing a white paper on return of individual research results
- Provided public commentary on key policy areas including:
  - HIPAA/CLIA conflict
  - Expanded definition of clinical trial such that basic research falls under clinical trial regulations
  - Fetal tissue research restrictions
  - EPA Notice of Proposed Rulemaking *Strengthening Regulatory Transparency* (proposal would allow the government to ignore past scientifically sound studies not adhering to proposed transparency standards)
- Reaffirmed ASIP’s 2015 policy on manipulating the human genome

Expanded Scope

“...seeks high-quality original research reports, reviews, and commentaries related to the molecular and cellular basis of disease. The editors will consider basic, translational, and clinical investigations that directly address mechanisms of pathogenesis or provide a foundation for future mechanistic inquiries. Examples of such foundational investigations include data mining, identification of biomarkers, molecular pathology, and discovery research. Foundational studies that incorporate deep learning and artificial intelligence are also welcome. High priority is given to studies of human disease and relevant experimental models using molecular, cellular, and organismal approaches.”
